- Final remarks - Simon Chevalking

Water Integrity

Integrity – the quality of being honest and having strong moral principles.

SDG 6 - wanting to achieve universal and equitable access to safe and affordable drinking water for everybody

Prioritizing water uses and users (investment, allocation, distribution)

Considering the basic needs and sustainable future of the water source

Water integrity implies honesty...

How we go about managing and sharing water

40th TheWaterChannel webinar

Q & A

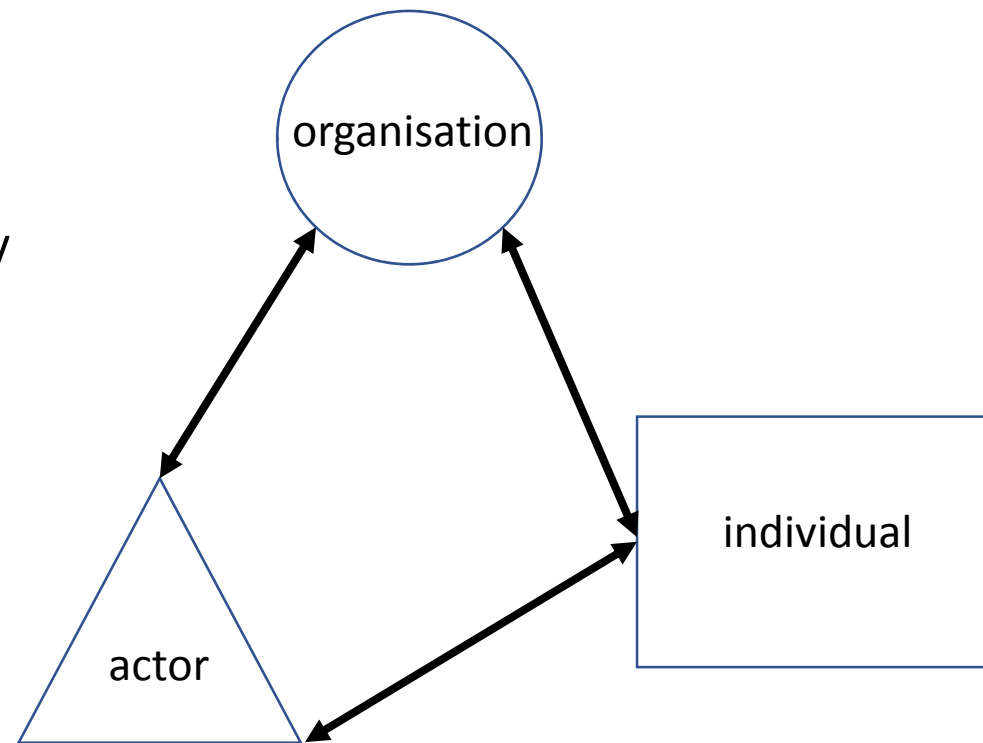

40th TheWaterChannel webinar

Final remarks

- Sharing water
